765 Chadds Ford Way
Kalamazoo, MI 49009-9321

RE: West KL Avenue Landfill Superfund Site

Dear Mr. and Mrs. Bower:

The U.S. Environmental Protection Agency is considering revising the West KL Avenue Landfill Superfund Site cleanup plan. We are holding an open house to share details with local residents.

The current plan requires closing private water wells and connecting residences to the municipal water supply. The proposed revision would allow existing wells to continue operating if they do not draw water from the contaminated aquifer; if there is a geological separation, such as a clay layer, between the contaminated and uncontaminated aquifers; and if there is regular monitoring to confirm that the aquifer water remains safe to drink.

If the proposed revision is adopted, homes in the Chadds Ford Way subdivision would not have to be connected to the municipal water supply. The open house will be:

Wednesday, May 14
6 – 8 p.m.
Oshtemo Community Center
6407 Parkview Ave., Kalamazoo

EPA representatives will be available to answer questions. You may also contact Project Manager Shari Kolak at 312-886-6151 or kolak.shari@epa.gov. If you have general questions or need special accommodations to attend the open house, contact me at 312-886-0725 or jones.teresa@epa.gov.

Sincerely,

Teresa Jones
